1. What is the term for permissions that can be used to override standard permissions such that users attempting to execute a file execute the file with the permissions of the owner or the group?

1 / 1 point

- ☐ sudo
- ☐ Rights
- ☐ root
- ☒ Special Permissions

✔ **Correct**

Correct! Special Permissions are permissions that can be used to override standard permissions such that users attempting to execute a file execute the file with the permissions of the owner or the group.

2. What command can be used to change the attributes of a file?

1 / 1 point

- ☐ lsattr
- ☐ chown
- ☐ chgrp
- ☒ chattr

✔ **Correct**

Correct! The chattr command is used to change the attributes of a file.

3. What flag can be set on a file that will prevent it from being modified even if the user has the write permission to the file or is the owner?

1 / 1 point

- ☐ Sticky Bit
- ☐ umask
- ☐ ACL
- ☒ Immutable

✔ **Correct**

Correct! The immutable flag is an extended attribute of a file or directory that prevents it from being modified.
