1. How many Gigabytes in a Terabyte? (Please type a number. Example: 512.)

1 / 1 point

1024

✓ **Correct**

Correct! Although the metric system is based on exponents of ten, computer storage is based on binary numbers therefore instead of 1000, it uses 1024.

2. What acronym is used to describe an operating system interface that uses icons, windows, and other graphic elements to help the user interact with the operating system? (Please type just the acronym in upper case. Example: DNS.)

1 / 1 point

GUI

✓ **Correct**

Correct! A graphical user interface (GUI) allows the user to interact with the operating system using icons, windows and other graphic elements.

3. What switch that needs to start with -- (two dashes) can give you a short, succinct description of the command and all of its options? (Example: If the command is "ls --switch" you would just type "switch".) (Please type only the switch, do not type the dashes. Remember, switches do not have spaces and they are case sensitive.)

1 / 1 point

help

✓ **Correct**

Correct! Using the --help switch can get you a short description of the command and its options.

4. What is the name of the free, open source software that can be used to create and host virtual machines? (Please type only the name all in lower case. Note: The name is one word and should not contain spaces. Example: quickbooks.)

1 / 1 point

virtualbox

✓ **Correct**

Correct! Virtualbox is free, open source virtualization software.
