1. What term is used to describe a file system that is used to recover quickly after a system crash by maintaining a list of all the changes that need to be made to the disk?

1 / 1 point

- ☒ journaling
- ☐ Floppy
- ☐ flash
- ☐ Tunable

✔ **Correct**

Correct! Journaling file systems allow the computer to recover quickly after a crash by maintaining a list of all the changes that need to be made to the disk which is called a journal.

2. You need to repair a file system. What command should you use?

1 / 1 point

- ☐ tune2fs
- ☐ fdisk
- ☐ mkswap
- ☒ fsck

✔ **Correct**

Correct! The fsck command is used to check the integrity of a filesystem. You can use the `fsck -r/dev/{filesystem}` command to repair a filesystem.
