## Congratulations! You passed!

**Grade received** 100% **To pass** 100% or higher

Go to next item

1.	You have a file named Data.txt. The first few lines of the file read:	1/1 point
	Name,Role	
	Shad, Trainer	
	Christin, Manager	
	Jamie,Executive	
		Ф
	You need to extract the list of roles from the file using the cut command. What command should you run?	<u> </u>
	cut -d ',' -f 2 Data.txt	
	O cut -d ',' Data.txt	
	O cut -f 2 Data.txt	
	Cut -s -d ';' Data.txt	
	<ul> <li>Correct         Correct! This tells cut that the delimited is a comma and to extract the second field.     </li> </ul>	
2.	Using the cat command, you display the contents of a text file Data.txt in the shell prompt. The contents are:	1/1 point
	Name,Role	
	Shad, Trainer	Ф
	Christin, Manager	
	Jamie,Executive	<u>@</u>
	You need to sort the data in the file in descending order by role. What command should you use?	
	osort -t ',' -r Data.txt	
	o sort -r -k 2 Data.txt	
	sort -t ',' -k 2 -r Data.txt	
	O sort -t ',' -k 2 Data.txt	
	Correct  Correct! This command will properly sort the data in the file by role in descending order. The -t option tells sort to use a comma as a delimiter. The -k 2 option tells sort to sort by the second field. The -r option tells sort to use the reverse of the default ascending order which would be descending order.	
3.	You need to display the last 10 lines of a file. What command should you use?	1/1 point
	O nl	
	O split	
	O head	
	tail	Ф
	<ul> <li>✓ Correct</li> <li>Correct! The tail command displays the last 10 lines of a file.</li> </ul>	Œ
