How do switches dec	cide where to send data?	1/1 point
O IP Address		
O Network Address	S	
O Duplex		
MAC Address		
where they rec port with the d	send data to all the nodes connected to the hub. Switches, however, have a CAM table cord which MAC addresses are associated with each port. Then they send the data to the destination MAC address. The only time switches send the data to all ports (flood the data) is it have the destination MAC address in their CAM table, or when the data is a broadcast.	
2		
	re information about routes?	1/1 point
Their routing tab		
O Their CAM tables		
	rtion of the IP address. n of the IP address.	
	not the ir address.	
	ers store information about routes in their routing tables.	
	the unique address assigned to a network interface card (NIC) by the manufacturer?	1/1 point
ARP Address		
O IP Address		
MAC Address		
O Default Gateway		
	IAC address is a unique address assigned to the NIC by the manufacturer.
