1. Which command utilizes data from the /var/log/lastlog file to display the latest login details of all users? (Please type only the command. Remember, commands are case sensitive. Example: date)

1 / 1 point

> lastlog

✅ **Correct**
Correct! The lastlog command utilizes data from the /var/log/lastlog file to display the latest login details of all users.

2. In what mode is SELinux turned off? (Please type only the name of the mode all in lower-case. Example: working)

1 / 1 point

> disabled

✅ **Correct**
Correct! In the disabled mode SELinux is turned off.

3. When are system logs usually started? (Please type your one-word answer all in lower case. Example: shutdown)

1 / 1 point

> boot

✅ **Correct**
Correct! System logs are usually started at boot.

4. You have edited the /etc/rsyslog.conf file to configure rsyslog. In the shell prompt, you type:

1 / 1 point

sudo systemctl _____ rsyslog.service

You need to complete the command to activate the changes you have made to the file. What command should you type in the blank space? (Please type only the command itself. Do not type any switches or keywords. Remember, commands do not have spaces in them, and they are case sensitive. Example: ls)

> restart

✅ **Correct**
Correct! After editing the configuration file, you need to restart the service.
